

Pro-active

Analysis and Resolutions for a Retailer

Pro-active analysis and resolutions for a leading UK retailer

Client is a leading retailer of apparels and clothes in UK

Highlights

Before go-live of OCCO-Base, in KT phase, Zensar had done pro-active analysis and deep dive in ODS, BOXI and ETL code and found large number of technical and functional issues. Following which, Zensar optimized and improved performance in base model of ODS, changed key functionality of "image rank", deployed auto data purging with changes in hints, partitioning, parallelism and few changes in the data model.

Company:

Leading retailer

Headquarters:

London, UK

Industries:

Retail
